

We are technical support company, cooperating with industry many sectors, mainly with chemical, petrochemical, machine building, paper industries and power generation sector as well.

We provide complete package realizations of our Customer own projects, we support them with technical consulence and relevant services as well. On the other hand we also guarantee package deliveries of all components being necessary to modernization or to erection of a new system / installation to be build by our Customer himself.

We focus on 2 branches:

- plant instrumentation and analitics
- hydraulic control and drive systems
